Instructions For Use RHINO ELBOW SPLINT

Published: 2024

DESCRIPTION

The Rhino Elbow Splint is a medical device intended for use with pediatric patients in need of elbow stabilization to protect, support, and/ or treat conditions or injury to the elbow and as instructed by a healthcare provider. A consistent examination scheduled with the clinical provider is needed to ensure proper fit, use, and instruction for caregivers and/or users. Compliance with instructions for use and clinical care treatment plan is important to achieve clinical and therapeutic outcomes.

MATERIALS

The Rhino Elbow Splint is made from Black PSA Hook, Black Bias Binding, cotton, Plastic Washer, nylon, Metal Look w/Black Chafe, steel, aluminum, rivet semi-tubular, polyester, polyethylene, polyurethane foam, chromium, and nitric acid.

INDICATIONS FOR USE

The Rhino Elbow Splint is intended for use with pediatric patients in need of elbow stabilization to protect, support, and/ or treat conditions or injury to the elbow and as instructed by a healthcare provider.

WARNINGS AND PRECAUTIONS

- Follow the qualified healthcare provider and physician instructions or treatment plan.
- Follow instructions to ensure straps are tightened properly, to reduce risk of irritation, blisters, and pressure ulcers.
- Consult your healthcare provider immediately if the child is experiencing pain, irritation, blisters, swelling, pressure ulcers, or if the brace is not fitting properly.
- The Rhino Elbow Splint should be used without additional components or accessories, unless instructed by the healthcare provider.
- Do not use a Rhino Elbow Splint that is damaged, broken or not functioning properly.
- Modification is not recommended for the Rhino Elbow Splint.

MRI SAFETY INFORMATION

The Rhino Elbow Splint brace is MR unsafe and should remain outside the MRI scanner room.

CLEANING INSTRUCTIONS

- Wash on delicate cycle or hand wash with mild detergent. Rinse thoroughly.

STORAGE AND HANDLING

- The Rhino Elbow Splint requires no special handling during transport or storage.
- The Rhino Elbow Splint is a nonsterile device.

APPLYING THE BRACE

Follow clinical care plan and clinical care team guidance for application.
